Lincolnshire Police Cyber Crime Unit

Cyber Protect: how we can help your business

The Cyber Protect Team was set up to help protect small to medium-size businesses and charities from the ever-growing threat of cyber crime.

We provide advice, presentations and planning exercises with businesses and charities to raise awareness of cyber threats and help organisations protect themselves.

All our services are continually revised to make sure they are up to date with the latest security guidance from the National Cyber Security Centre (NCSC).

Our free services include:

- **Staff Cyber Awareness Training**

Tailored to your organisation's needs regarding timing, content and focus on topics that may be a risk to your business/community/network. Our presentations can be delivered virtually or in person. We also have a selection of video presentations.

We can talk about a whole range of topics including current threats, how to spot phishing emails, why password security is important, staying safe at home, social engineering, device security and much more

- **Cyber Security Reviews**

Whilst this review is not accredited, it is a good stepping stone to beginning the Cyber Essentials process and a good starting point for those organisations who are concerned about their current Cyber Security posture.

- **Tabletop Exercise**

A table-top exercise designed to raise awareness of the importance of cyber security for your organisation. Participants, usually decision makers within the organisation, learn the importance of making timely and correct decisions when it comes to cyber security, including what should be a priority.

- **Event Attendance**

We can provide speakers for your events and support with information and awareness stands.

To discuss any requirements you may have (including those which may be in addition to anything stated above), please do not hesitate to contact us using the details below.

Phone: 01522 947395

NCSC - Cyber Essentials - www.ncsc.gov.uk/cyberessentials

Cyber Essentials is a simple but effective, Government backed scheme that will help you to protect your organisation, whatever its size, against a whole range of the most common cyber attacks.

There are two levels of certification:

- **Cyber Essentials**

Our self-assessment option gives you protection against a wide variety of the most common cyber-attacks. This is important because vulnerability to simple attacks can mark you out as target for more in-depth unwanted attention from cyber criminals and others.

Certification gives you peace of mind that your defences will protect against the vast majority of common cyber-attacks simply because these attacks are looking for targets which do not have the Cyber Essentials technical controls in place.

- **Cyber Essentials Plus**

Cyber Essentials Plus still has the Cyber Essentials trademark simplicity of approach, and the protections you need to put in place are the same, but for Cyber Essentials Plus a hands-on technical verification is carried out.

Police CyberAlarm - www.cyberalarm.police.uk

Police CyberAlarm is a free tool to help your business understand and monitor malicious cyber activity.

Police CyberAlarm acts as a "CCTV camera" monitoring the traffic seen by your businesses' connection to the internet. It will detect and provide regular reports of suspected malicious activity, enabling your business to minimise your vulnerabilities.

East Midlands Cyber Resilience Centre - www.emcrc.co.uk

The East Midlands Cyber Resilience Centre (EMCRC) is set up to support and help protect businesses across the region against cyber crime.

By working in conjunction with local universities and the five East Midlands police forces - Derbyshire, Leicestershire, Lincolnshire, Northamptonshire and Nottinghamshire - we possess the latest information on emerging cyber threats, criminal trends and best safeguarding practice.

East Midlands Cyber Secure - www.eastmidlandscybersecure.co.uk

East Midlands Cyber Secure This website has been created by the East Midlands Cyber Protect Network. This network consists of police officers and staff from the five forces in the region whose goal is to help protect individuals and organisations from the adverse effects of cybercrime.

Report Cyber Crime and Fraud

Action Fraud

Action Fraud is the UK's national fraud and cyber crime reporting centre, which takes crime reports from victims and provides a crime reference number. Action Fraud provides a single place for victims of fraud and cyber crime to report to or get advice on protecting themselves.

For more advice, visit www.actionfraud.police.uk or call 0300 123 2040.

Suspicious Email Reporting Service

If you've received what you believe to be a phishing email, you can report this to the Suspicious Email Reporting Service. Simply forward the suspected email to report@phishing.gov.uk
